TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, Dart

Developer Tools: VS Code, Android Studio, XCode, IntelliJ, Postman

Technologies/Frameworks: Flutter, Supabase, Firebase, GitHub, Node.js, Express.js, MongoDB, Git, AWS

INTERNSHIP

FitStart 

Jun 2025 – Sep 2025

SDE Intern

Remote

- Led development of a gym discovery module by integrating **Google Maps** and location-based queries, successfully tested with **50+ partner gyms**.
- Integrated immersive **3D gym views**, creating interactive previews to enhance user decision-making during pilot testing.
- Implemented a redesigned UI with **animations** and built-in transitions, resulting in smoother navigation and improved user experience in MVP demos.
- Crafted a robust **database schema** for efficient data storage and retrieval, reducing query times by **25%** during internal testing.

PROJECTS

Mend AI  | Flutter, Provider, Firebase, Node.js, Gemini

Aug 2025 – Sep 2025

- * Engineered a Gemini-powered voice therapy app, successfully validated with over **30 pilot users**.
- * Architected a resilient audio streaming pipeline using Node.js Firebase, ensuring zero data loss for **10+ concurrent sessions**.
- * Implemented a Hugging Face model for audio-based emotion detection, achieving **85% accuracy** across 5 emotions.
- * Developed automated end-of-session reports with emotional analytics and AI-driven partner recommendations.

Meal-Monkey  | Flutter, Firebase, Node.js, MongoDB, Google Maps, Razorpay

Feb 2025 – Jun 2025

- * Delivered a multi-role food delivery platform with **customer**, **restaurant**, and **delivery partner** apps, enabling seamless coordination across **50+ test orders** during development.
- * Engineered backend pipelines where restaurant listings propagate to customers using **MongoDB aggregations**, and integrated **Razorpay** with coupon support to simulate **100+ payment transactions**.
- * Integrated **Google Maps** APIs for real-time delivery tracking, validating with **30+ mock delivery routes** to ensure accuracy of live status updates.
- * Revamped user engagement by adding a unique weather-based food recommendation engine and independently architecting the full system workflow across all apps.

Quizzler  | Flutter, GetX, Firebase, Gemini, QuizAPI

Nov 2024 – Jan 2025

- * Built a scalable quiz platform for **50+ tech students** with 10+ topic-wise quizzes covering DevOps, Kubernetes, and Networking, enhancing peer learning and competitive preparation.
- * Integrated **Gemini LLM** to dynamically generate diverse, high-quality quiz questions, boosting content freshness and reducing manual curation efforts by 80%.
- * Architected a high-performance backend using Firebase Firestore and Auth, reliably handling **500+ quiz attempts** while providing real-time user management and progress tracking.

EDUCATION

Vellore Institute of Technology

Aug 2022 – May 2026

B-Tech CSE - **CGPA - 8.34**

ACHIEVEMENTS & EXTRACURRICULAR

- Served as **Finance Head** of the Linux Club for 2 years, managing budgets, event funds, and resource allocations to support 5+ technical workshops and hackathons.
- Secured a position in the **Top 50 nationwide in Code for Bharat Season II Hackathon**, competing among 10,000+ participants.
- Achieved **1st place** in the Stock Market Simulation event at Advitya 2024, outperforming 400+ participants through strategic trading decisions.
