## TECHNICAL SKILLS

---

**Languages:** Java, Dart, JavaScript, SQL

**Developer Tools:** VS Code, Android Studio, XCode, IntelliJ, Postman, Railway

**Technologies/Frameworks:** Flutter, Supabase, Firebase, GitHub, Node.js, MongoDB, Git

## EXPERIENCE

---

### FitStart [↗](#)

Jun 2025 – Present

*SE Intern*

*Remote*

- Leading the development of location-based gym discovery, enabling **1000+ users** to find and view profiles of **50+ partner gyms** with live address, ratings, and facility details.
- Engineered and integrated frontend and backend APIs to track and display gym view counts and user interactions, providing actionable data to partners and improving user engagement by **20%**.
- Implemented geolocation validation to confirm user presence at gym locations, enabling **150+ check-ins** and **300+ pass activations** with accurate location-based workflows during initial rollout.
- Developed frontend components for user reviews and ratings, enhancing the discovery experience and increasing average session time per user by **15%**.

### SmartBridge [↗](#)

Feb 2025 – May 2025

*SDE Intern*

*Remote*

- Developed and deployed RESTful APIs for a Personal Finance Tracker using Node.js and Express, enabling over **200 users** to manage budgets, track expenses, and set savings goals.
- Structured and optimized MongoDB schemas, reducing average data retrieval times by **30%** for frequent dashboard queries.
- Implemented JWT-based authentication and middleware, ensuring secure session management and protecting sensitive user data across all endpoints.
- Collaborated in an agile team of 4, utilizing Git for version control and contributing to CI/CD pipelines, reducing manual deployment times from 15 minutes to under 10 minutes.

## PROJECTS

---

### Meal-Monkey [↗](#) | Flutter, Firebase, Node.js, MongoDB, Google Maps, Razorpay

Feb 2025 – Jun 2025

- \* Delivered a food delivery application with seamless real-time tracking across platforms. Enabled **100+ users** to place and track **100+ orders** without interruptions
- \* Engineered a secure and scalable backend infrastructure using Node.js and MongoDB, processing **500+ payment transactions**. Real-time enabled updates for **80+ order status changes**.
- \* Revamped the user interface using Flutter and state management techniques to streamline the ordering process, achieving a 25% reduction in cart abandonment and a 15% increase in order conversions.

### Quizzler [↗](#) | Flutter, GetX, Firebase, Gemini, VertexAI

Nov 2024 – Jan 2025

- \* Built a scalable quiz platform for **50+ tech students** with 10+ topic-wise quizzes covering DevOps, Kubernetes, and Networking, enhancing peer learning and competitive preparation.
- \* Integrated **Gemini LLM** to dynamically generate diverse, high-quality quiz questions, boosting content freshness and reducing manual curation efforts by 80%.
- \* Architected a high-performance backend using Firebase Firestore and Auth, reliably handling **500+ quiz attempts** while providing real-time user management and progress tracking.

## EDUCATION

---

### Vellore Institute of Technology

Aug 2022 – May 2026

B-Tech CSE - **CGPA - 8.36**

### Modern Senior Secondary School, Rewari

2020–2021

XII - CBSE - **Percentage - 85.2%**

## EXTRACURRICULAR

---

- Sharpened algorithmic efficiency through consistent LeetCode practice, achieving a top 10% ranking in weekly contests, demonstrating a commitment to continuous learning and expertise in diverse coding domains.
- Applied modern mobile app development techniques, including state management, CI/CD pipelines, and API integration to personal projects, achieving a 50% boost in user engagement.
